

Ms. Hale Room 301

I am excited to return to the Eduprize science Department. I will be teaching Biology, IB Biology years 1 & 2, Environmental Science, and Chemistry. I have been teaching for 4 years and I am certified in K-12 Special Education, K-8 General Education, and 9-12 Biology. I have a Bachelors in Education/ Special Education and a Bachelors in Biology with a certificate in Evolutionary Medicine. My first goal as a teacher is to help you ask questions about the world and approach answering those questions with logic and scientific thinking. My second goal as a teacher is to help you consume scientific material critically.

I have one dog who is a Great Pyreneese/ Saint Bernard Mix. I also have 2 ball pythons that live at school so you will get to meet them throughout the year. I love being outdoors, building legos, and being active.

You need the following daily for Biology, Chemistry, and Environmental Science

- Chromebook
- Composition Notebook (Chemistry should be a graphing composition notebook)
- Pencil/ Pen
- Colored pencils
- Scientific calculator
- Tape (if you want that rather than to staple things into your notebook)

Supplies I could use daily

- clorox wipes
- paper towels
- tissues
- printer paper - white or ANY color
- index cards 4x6 or 3x5
- Colored pencils
- expo markers
