

Dear Eduprize Junior High 8th Graders and Families,

Welcome to the 2026–2027 school year! My name is Mr. Jackson, and I am thrilled to be your 8th grade science teacher here at Eduprize Junior High. This will be my fourth year teaching at Eduprize. I am passionate about helping every student discover a genuine love of learning, and I look forward to building that together in our classroom this year.

I am originally from Washington State— I earned my Bachelor’s degree in Psychology from Washington State University in 2014, and most recently completed my Master’s degree in Secondary Education in 2024. My background in psychology has shaped the way I think about how students learn, and I bring that perspective into the science classroom every day.

Outside of school, I love spending time in the great outdoors. Hiking and exploring nature are some of my favorite activities, and my wife and I have made it our mission to take our 1-year-old son along on all of our adventures. In the fall, you’ll catch me watching both professional and college football. So if you’re a fan too, we’ll have plenty to talk about!

I believe science is all around us, and my goal is to make our classroom a place where curiosity is celebrated and questions are always welcome. I can’t wait to get to know each of you and have an incredible year of discovery together. Please don’t hesitate to reach out if you ever have questions or concerns — my door is always open.

Here’s to a wonderful year ahead!

Warm regards,

Mr. Jackson

8th Grade Science | Eduprize Junior High
