

Hello! My name is Jessica Bonilla and I am the elementary science teacher. I'm excited to be at EDUPRIZE! My teaching background includes teaching 5th Grade, Kindergarten and Physical Education. I have a Bachelor's of Science in Nutrition as well as a Secondary Health Endorsement (grades 6-12).

Whether you are a curious first grader observing the world or a sixth grader preparing experiments and collaborating with ideas, I am thrilled to be on this journey with you! In science, we will learn about the world around us, encourage curiosity and learn to think critically. We will make real-world connections and understand how science impacts our environment and daily lives.

I'm married with 3 amazing boys and 3 wonderful dogs. We are usually at a track (for cross country/ track), pool (water polo), court (tennis) or field (soccer). I also coach and play fastpitch softball in my "spare time".
